

Name of session: Technical and innovative fair

Session number: 3

Conveners: Water for people

Approx. Number of participants: 57

Name of rapporteur: Doreen Kabasindi Wandera

Copies of all slides collected? Yes

Short summary of the session: objectives, highlights and conclusions

1. Showcase technical innovations that work in both rural and urban areas.
2. Develop key recommendations for incorporation into country programmes.

Highlights:

1. Research agencies should strengthen collaboration and synergy between different actors in the sanitation sector including; CSOs, government, private agencies, similar research organizations for enhanced learning and sharing.
2. Explore innovating sanitation technologies for the rural communities.
3. Need for public health considerations in the development of technologies especially in regard to ultimate pathogen removal.
4. Ethical consideration in sanitation research including community engagement and participation.

Recommendations for ministerial commitments:

1. Look at sanitation as a development issues that contributes to income generation from reuse products i.e waste to wealth.(Products like biogas, briquettes, fertilizer among thers)

Quote:

From waste to wealth.
