

# Summary of Agreed Country Actions

Dr Kepha Ombacho  
Director of Public Health  
Ministry of Health  
Republic of Kenya

# Reminder: The Process

- Pre-AfricaSan 4 – country preparation meetings
  - Identified successes
  - Identified challenges
  - Agreed draft priorities
- At AfricaSan 4 – country dialogue sessions
  - Country peer learning
  - Revision of priorities
- This Presentation
  - A summary, including examples, but does not cover the wealth of information generated in the sessions.

# Countries want ambitious targets for sanitation especially on the elimination of open defecation

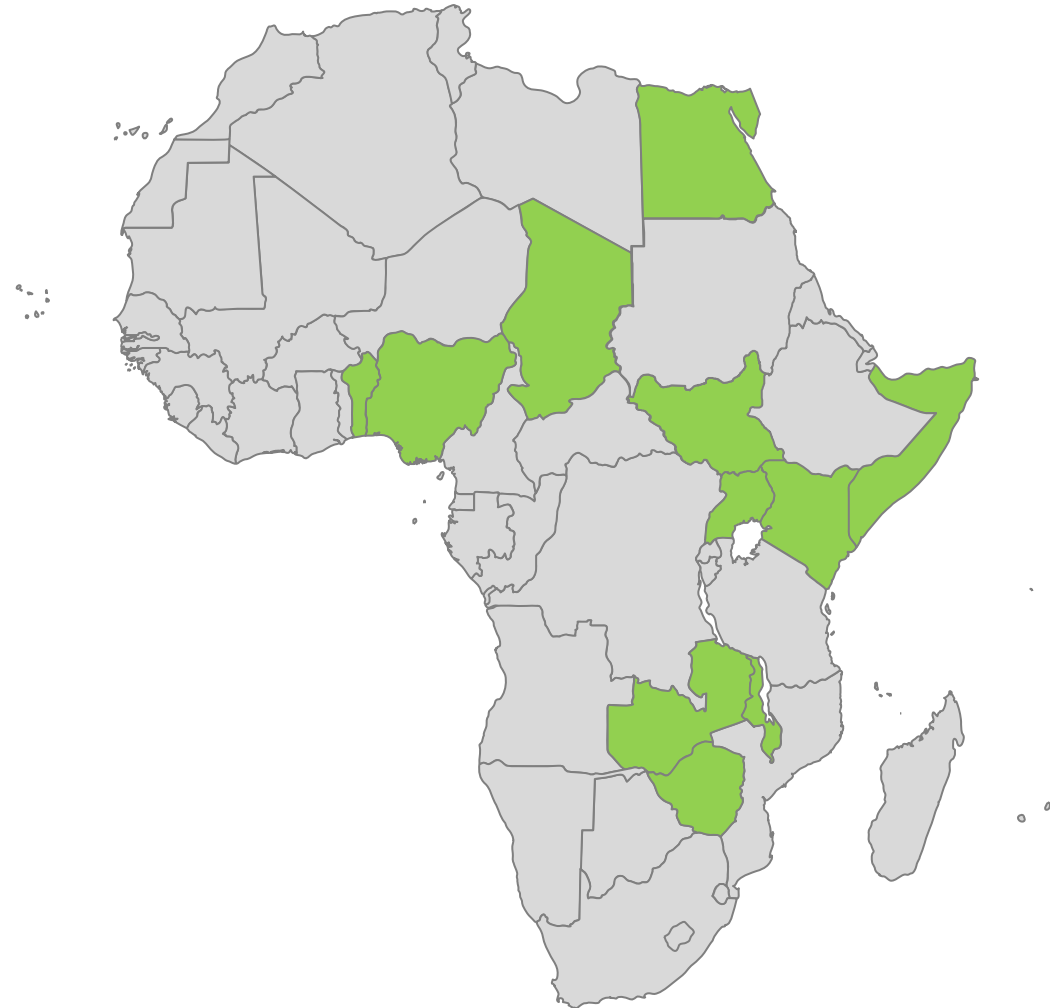

For example:

- ODF Tanzania by 2019
- ODF Nigeria by 2025
- Kenya ODF by 2018
- Rwanda Plan is to be 100% ODF in next 2 years

# Prioritize Institutional Arrangements

1. Inter-ministerial coordination mechanisms (international and national)
  - Bring a fragmented sector together to pay more attention to Sanitation and Hygiene
  - Improve inter-ministerial coordination of the WASH sector
  - Institutional reorganization and re-definition of roles to address the current lack of coordination
  - Ensure there is a single lead institutions and harmonize policies
  
2. Sub-national governance systems (local government)
  - Strengthening subnational governance systems
  - Structured Sub-national level governance – recognized as a bottleneck in implementation
  - Make sanitation part of the national decentralization program
  - Augmentation of National WASH Steering committee to sub national levels

# Going Forward: Develop, review or harmonise national sanitation and hygiene policies

# ODF strategies and plans: developing roadmaps towards attaining ODF (targets and verification)

# Financing – A clear priority

- Sanitation investment plans and financing strategies.
- Transfer resources to decentralised government and address equity.
- Finance strategies for urban and rural areas
- Ring-fenced sanitation budgets and improved finance tracking mechanisms

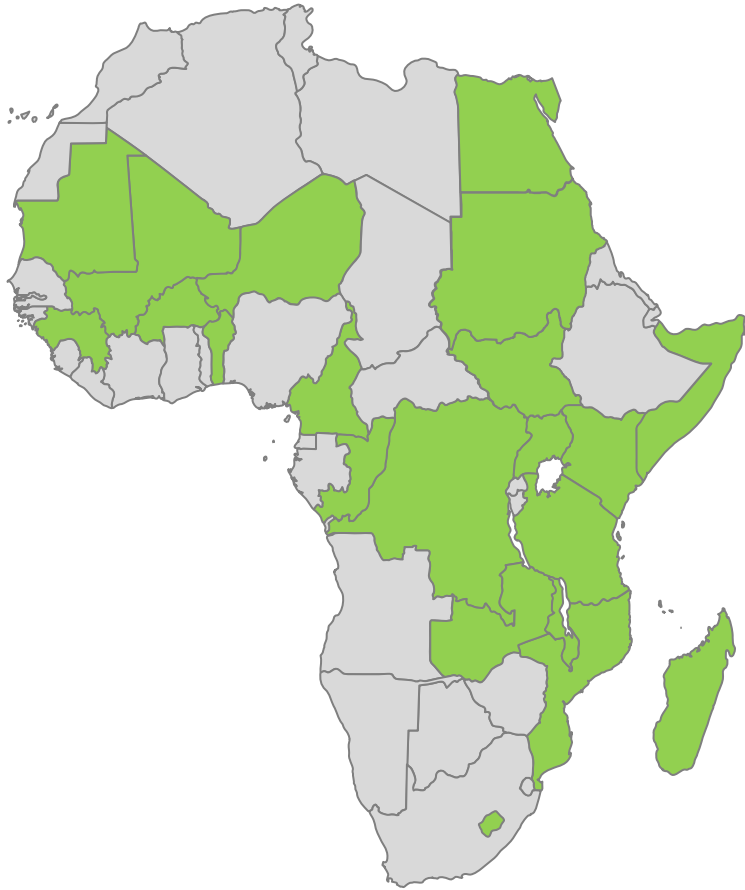

# Monitoring Systems

- Develop and strengthen monitoring systems on access
- Performance monitoring for effective implementation
- ODF verification and certification systems,
- Identify technology options (such as mobile phones – where available)
- Build sector capacity for monitoring.

# Sanitation Capacity Needed Across the Continent

Word-Cloud from country priorities
